PROFESSIONAL SUMMARY

Junior Flutter Developer with 6 months of professional experience building cross-platform mobile applications using Flutter and Dart. Experienced in REST API integration, Firebase, state management, local databases, responsive UI, and clean architecture. Hands-on experience contributing to production applications, including a live iOS application, alongside personal projects involving Flutter, Django REST Framework, and AI API integration. Strong interest in building maintainable mobile applications and continuously improving development, debugging, and software engineering practices.

PROFESSIONAL EXPERIENCE

Betopia Group

Junior Flutter Developer

Mar 2026 – Present

Dhaka, Bangladesh

- Develop and maintain cross-platform mobile applications using Flutter and Dart in a professional development environment.
- Work with REST APIs and backend services to integrate application features and manage data flows.
- Implement responsive user interfaces, reusable Flutter components, and state management solutions for maintainable applications.
- Work with Firebase and third-party services as required for application functionality and data handling.
- Debug application issues, improve UI behavior, and support application stability throughout the development lifecycle.
- Collaborate with team members to implement features, fix issues, and deliver application updates.

TECHNICAL SKILLS

Mobile Development Flutter, Dart, Responsive UI, REST API Integration, JSON Parsing, Animations, Device APIs

State Management Provider, Riverpod, GetX

Backend & APIs Django, Django REST Framework, REST APIs, JWT Authentication, WebSocket

Firebase Authentication, Cloud Firestore, Cloud Messaging, Analytics, Crashlytics

Local Storage SQLite, sqflite, Hive, SharedPreferences

Architecture & Design Clean Architecture, MVC, MVVM, Repository Pattern

Programming Languages Dart, Python, Kotlin, JavaScript, C

Web Technologies HTML5, CSS3, Bootstrap

Tools Git, GitHub, Postman, Android Studio, Visual Studio Code

AI & API Integration Google Gemini API, Hugging Face APIs, AI Integration in Flutter

SELECTED PROJECTS

EzyDash — Student Marketplace

Flutter • REST APIs • Production App • iOS

- Contributed to the development and maintenance of a production-level student marketplace application built for student-focused services and community interactions.
- Worked on Flutter-based mobile application features and user-facing functionality within a professional development environment.
- Supported API-integrated application workflows, UI improvements, debugging, and application stability.
- Live application available on the Apple App Store.

PocketVault — Full-Stack Productivity App

Flutter • Django REST Framework • JWT • SQLite • Provider

- Built a multi-feature productivity application using Flutter and Django REST Framework.
- Developed REST APIs with JWT authentication and user-specific data handling using Django ORM.
- Implemented offline-first local storage using SQLite and integrated the Flutter frontend with the backend API.
- Structured the application using clean architecture principles and Provider for state management.

Saidur's Portfolio Website

Flutter Web • Firebase Auth • Firestore • MVVM • Provider

- Built a responsive Flutter Web portfolio with a CMS-style admin dashboard for managing dynamic content.
- Implemented Firebase Authentication for admin access and Cloud Firestore for real-time content management.
- Structured the application using MVVM architecture with Provider for state management.

TravelSnap — Travel Management App

Flutter • Firebase • REST API • GPS • Geocoding • FCM

- Developed a cross-platform travel application with authentication, real-time data, image uploads, and location-based functionality.
- Integrated GPS, geocoding, REST APIs, Firebase Cloud Messaging, and Firebase services.
- Implemented responsive interfaces and interactive application features using Flutter.

ChatPro — Real-Time Chat Application

Flutter • Firebase • GetX • Firestore • Clean Architecture

- Built a real-time chat application with authentication and Firestore-based messaging.
- Implemented a WhatsApp-inspired user interface with GetX state management and clean architecture principles.

Digital Shop — Digital Product E-commerce App

Flutter • Supabase • Riverpod • Dio • Repository Pattern

- Ongoing project focused on building a digital product e-commerce application with a scalable Flutter architecture.
- Currently developing the frontend and application UI with planned backend integration using Supabase and Dio.

EDUCATION

Dhaka Polytechnic Institute

Diploma in Computer Engineering — Computer Science & Technology

2022 - 2026

Dhaka, Bangladesh

Ali Ahmed School and College

Secondary School Certificate (SSC) — Science

2021

Bangladesh

CERTIFICATIONS & TRAINING

- **Flutter & Dart App Development** — Ostad
- **Web Development** — Bohubrihi (Certified)
- **Self-Learning:** Django, Django REST Framework, Python, Kotlin, JavaScript, AI API Integration

LANGUAGES

Bengali: Native • **English:** Intermediate • **Hindi:** Basic
