PROFESSIONAL SUMMARY

Junior Flutter & Django Backend Developer with 6+ months of professional experience developing production-ready mobile applications and building robust RESTful backend services. Proficient in Flutter, Dart, Python, Django, and Django REST Framework (DRF) with practical hands-on experience designing database models, CRUD APIs, JWT authentication, and full-stack integration. Highly skilled in leveraging modern AI-assisted engineering workflows to rapidly research, architect, and deliver scalable, maintainable solutions. Experienced in state management, app store publishing, and cross-functional team collaboration.

PROFESSIONAL EXPERIENCE

SM Technology — A Betopia Group Company

Mar 2026 – Present

Junior Flutter Developer — *Dhaka, Bangladesh*

- Developing and maintaining production mobile applications using Flutter and Dart, following structured and maintainable coding practices.
- Working with REST APIs, Firebase, and backend services to integrate application features and manage data-driven workflows.
- Handling Google Play Store and Apple App Store publishing, including release preparation, versioning, and deployment processes.
- Gaining hands-on experience with in-app purchasing workflows and related application integration requirements.
- Gaining practical experience with application deployment, cloud-based production environments, and release lifecycle management.
- Collaborating within a professional team environment, including task coordination, feature planning, and cross-team communication.
- Gaining exposure to client communication and project management workflows, including requirement gathering, progress tracking, and delivery coordination.

TECHNICAL SKILLS

Backend & APIs: Django, Django REST Framework, Python, RESTful API Development, JWT Authentication, WebSocket

Mobile Development: Flutter, Dart, Responsive UI, REST API Integration, JSON Parsing, Animations, Device APIs

State Management: Provider, Riverpod, GetX

Databases & Storage: PostgreSQL, SQLite, sqflite, Hive, SharedPreferences

Architecture & Design: Clean Architecture, MVVM, MVC, Repository Pattern, Full-Stack Integration

Firebase & Cloud: Firebase Authentication, Cloud Firestore, Firebase Cloud Messaging (FCM), Analytics, Crashlytics

Web Development: JavaScript, HTML5, CSS3, Bootstrap

Deployment & Monetization: Google Play Store, Apple App Store, In-App Purchases, Google AdMob

Programming Languages: Dart, Python, JavaScript, Kotlin, Java, Go *(Basic)*, C *(Basic)*

Tools & AI: Git, GitHub, Postman, Android Studio, VS Code, ChatGPT, Claude, AI-assisted development, Google Gemini API, Hugging Face APIs

PROJECTS

PocketVault — Full-Stack Productivity App *Flutter • Django REST Framework • JWT • SQLite • Provider*

- Built a multi-feature productivity application using Flutter and Django REST Framework with a structured full-stack architecture.
- Developed REST APIs with JWT authentication, user-specific data handling, and Django ORM-based database operations.
- Implemented offline-first local storage using SQLite and integrated the Flutter application with backend APIs for synchronized data workflows.
- Applied Clean Architecture and Provider for maintainable code organization, state management, and scalable feature development.

EzyDash — Student Marketplace *Flutter • REST APIs • Firebase • Socket.IO • Production App*

- Developed and maintained a production mobile application deployed on Google Play Store and Apple App Store, supporting student-focused marketplace services and community interactions.
- Implemented 6+ marketplace categories (Accommodation, Events, Services, Jobs, Marketplace, Giveaways) with filtering, real-time search, and pagination.
- Integrated REST APIs and Firebase services including Authentication, Cloud Messaging, Analytics, and Crashlytics for reliable functionality and monitoring.
- Developed real-time user-to-user messaging using Socket.IO and social features including profiles, following, saved listings, and activity tracking.
- Implemented payment and event features including Airtel Money and MTN Mobile Money integration, QR-based ticketing, promo codes, and Google Maps with location-based functionality.

ChugChain — Social Video Sharing Platform *Flutter • REST APIs • Firebase • Video Streaming • GetX*

- Developing a TikTok-style social video sharing application with friend-based networking, interactive video feeds, and cross-platform mobile experiences.
- Implemented an optimized video feed with controlled preloading, network streaming, auto-looping, lazy loading, and visibility-based performance optimization.
- Built media workflows including camera capture, video compression, multipart uploads, thumbnail generation, and cached media delivery.
- Developed social features including friend discovery, profiles, likes, reporting, sharing, and Firebase-powered push notifications, Analytics, and Crashlytics.
- Implemented monetization features including in-app purchases, subscription management, and Google Mobile Ads with ad-free premium tiers.

TravelSnap — Social Travel Platform *Flutter • Firebase • GoRouter • GPS & Maps*

- Built a social travel platform for sharing public and private GPS-tagged trips, featuring a community feed with user engagement and real-time updates.
- Implemented Firebase Authentication, Cloud Firestore with offline caching, FCM push notifications, and ImgBB REST API for image uploads.
- Integrated Google Maps, Geolocator, and Geocoding for automatic address resolution, utilizing GoRouter for declarative navigation.

EDUCATION

Dhaka Polytechnic Institute **2022 – 2026**
Diploma in Computer Engineering — Computer Science & Technology *Dhaka, Bangladesh*

Ali Ahmed School and College **2021**
Secondary School Certificate (SSC) — Science *Bangladesh*

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Flutter & Dart App Development — Ostad
Certificate

Web Development — Bohubrihi
Credential

Self-Learning & Professional Development
Django, Django REST Framework, Python, Kotlin, JavaScript, AI API Integration

LANGUAGES

Bengali: Native • **English:** Intermediate
